

APPARATUS AND METHOD FOR DIRECTING UPLOADING SCANNED IMAGES TO ASSOCIATED WEB SITES

5

ABSTRACT OF THE INVENTION

An apparatus and method for directly making a computer system that couples with a scanner to connect with an associated web site and for further uploading scanned images by means of one touch action from the scanner is disclosed. Individual may give command in scanner side via one touch action to make the computer system coupled with the scanner to connect with associated web sites. Individual may upload derived scanned images to the connected web sites by means of one touch action in the scanner. Additionally, individual may assign web sites, or confirm/vary URLs of the web sites before uploading the scanned images.
